

## **Solar Thermal 2 Day Course (Logic Certification)**

### **Aim**

This 2 day course will focus on the installation of solar collectors (panels & evacuated tubes) and associated domestic hot water systems. (An unvented qualification is needed in addition to undertaking this course – this can be carried out by attending an extra day at the end of the solar course).

### **Course Outline**

The Solar Thermal Training Course covers the following topics

- Regulations & standards
- Collector types
- Solar heated storage vessels
- Solar primary circuit types
- Basic system design & integration
- External & internal site survey requirements
- Filling & commissioning
- Servicing & fault finding

Day 1 - Training

Day 2 - Assessments including Practical and Multi-choice Paperwork assessments

All training material will be provided at the beginning of the course

### **Optional**

Day 3 - Unvented training and assessment if not held already

### **On completion**

Once the course is completed, candidates are able to register on the micro-generation scheme to install and service solar thermal systems.

### **Price Per Candidate**

£450 + VAT plus £44 Certification fee
